Set of fixtures for coating inserts CC800®HiPIMS

Item no. 33577

Optimized holding systems for precision tools are of central importance for coating. This holder set serves to optimize the utilization of your CC800®HiPIMS coating system for maximum and reproducible quality.

We would be happy to put together your individual holder set!

PVD holder set CC800®HiPIMS for cutting inserts.

With the holder set specially adapted to the CC800®HiPIMS, you can coat up to 5000 inserts* on 6 towers. We offer you the right solution for almost all commercially available inserts! Whether rods, clamping holders or magnetic holders - we are flexible! The PVD holder set CC800®HiPIMS contains coating towers, rods with compression springs, clamping rods, magnetic rollers as well as all accessories (such as pawls, adjusting rings, dummies, etc.).

With spiked and clamped inserts, the tools remain on the same holder system from pretreatment to coating - making labor-intensive, multiple recharging of inserts a thing of the past.

*12.7 mm x 3.5 mm
