

Turbo separator

Artikel-Nr. 33743

The compact CBMS 20 turbo separator guarantees economical and resource-saving operation of the wet blasting system.

Technische Daten

Coating procedure	Follow up treatment
	Pretreatment
Net weight	270 kg
Process step	radiate
measurement (LxWxH)	Dimensions plant: 550 x 800 x 1700 mm
Process step	Finishing
measurement (LxWxH)	min. footprint: 1000 x 1000 mm
Connector	480V/ 60Hz
Connected Load (KW)	2,7
Type	CBMS 20
Ampere	25 A

A constantly high blasting medium quality is guaranteed by the use of the separator. It separates the used blasting medium (e.g. high-grade corundum) from the blasting liquid in order to maintain the blasting quality at a constantly high level through targeted refilling of new blasting medium. In conjunction with the blast machine, the Turbo Separator operates almost fully automatically. It is installed near the blast machine. From the wet blasting system, the blasting liquid runs together with the blasting medium into the separator. There, the used blasting medium is separated. Refilling of the used blasting medium is possible quickly and accurately.
