

## Stereomicroscope Stemi 508

Artikel-Nr. 33946

Stemi 508 with its apochromatic optics offers you to capture images with excellent image contrast as well as color accuracy.

### Technische Daten

Net weight	<b>3,6 kg</b>
Type	<b>508</b>
Coating procedure	<b>Pretreatment</b>
Process step	<b>Incoming inspection</b>
Test method	<b>Microscopy</b> <b>Cluster analysis</b>

The mechanics are designed for a heavy workload. With the large object field of up to 36 mm, you always have an overview of your specimen. The 8:1 zoom allows magnification of details up to 50x. Includes segmentable LED ringlight for shadow-free ring illumination and oblique segment illumination: semicircle, quarter circle, double spot & 24 inch monitor.

Stemi 508 is more ergonomic than any other Greenough principle stereo microscope. Thanks to its small viewing angle of 35°, you will still adopt a relaxed posture even after many hours of work.

Observe and document your specimens exactly as they are with Stemi 508: detailed, focused and free of distortion or color fringing. Stemi 508 is your robust all-rounder for daily laboratory work and industrial inspections.
