Stereomicroscope Stemi 508

Item no. 33946

Stemi 508 with its apochromatic optics offers you to capture images with excellent image contrast as well as color accuracy.

Specifications

Net weight	**3,6 kg**
Type	**508**
Coating procedure	**Pretreatment**
Process step	**Incoming inspection**
Test method	**Microscopy** **Cluster analysis**

The mechanics are designed for a heavy workload. With the large object field of up to 36 mm, you always have an overview of your specimen. The 8:1 zoom allows magnification of details up to 50x. Includes segmentable LED ringlight for shadow-free ring illumination and oblique segment illumination: semicircle, quarter circle, double spot & 24 inch monitor.

Stemi 508 is more ergonomic than any other Greenough principle stereo microscope. Thanks to its small viewing angle of 35°, you will still adopt a relaxed posture even after many hours of work.

Observe and document your specimens exactly as they are with Stemi 508: detailed, focused and free of distortion or color fringing. Stemi 508 is your robust all-rounder for daily laboratory work and industrial inspections.
