Specifications

We are happy to plan with you! Count on us.

The gain in competence and independence by integrating your own coating plant into your production gives you full control over your product and promotes your flexibility and reaction speed.

CemeCon coats by itself. Every day. With coating technologies developed in-house, in the world's largest coating center for cutting tools. We are happy to pass on this wealth of experience to all customers who want to set up their own coating line:

- We plan and implement a production-ready coating line for you on your premises.
- We plan and supervise all production steps of the coating production, from installation to acceptance.
- We support you at the start of production in your production.
- We train your employees in all production steps of coating production.
- You benefit from our continuous technology and coating material development. Our development team will be happy to support you in your future applications. In this way, you remain fit for the future at all times!
- We ensure the continuous operation of your systems through comprehensive support and services.
