Type CBMS 20
Net weight 270 kg

measurement (LxWxH) min. footprint: 1000 x 1000

mm

Dimensions plant: 550 x 800 x

1700 mm

Connector 380-400V / 50Hz

 Connected Load (KW)
 2,7

 Ampere
 25 A

Experten kontaktieren

A constantly high blasting medium quality is guaranteed by the use of the separator. It separates the used blasting medium (e.g. high-grade corundum) from the blasting liquid in order to maintain the blasting quality at a constantly high level through targeted refilling of new blasting medium. In conjunction with the blast machine, the Turbo Separator operates almost fully automatically. It is installed near the blast machine. From the wet blasting system, the blasting liquid runs together with the blasting medium into the separator. There, the used blasting medium is separated. Refilling of the used blasting medium is possible quickly and accurately.
